I. INTRODUCTION AND SUMMARY OF OPINIONS

1. I have been retained by counsel for the Plaintiffs as an expert in connection with the above-captioned litigation and have actual knowledge of matters stated herein. If called to testify in this matter, I would testify truthfully based upon my expert opinion.

2. In summary, the informed consent forms required by the State Boards of Medicine and Osteopathic Medicine include numerous factual inaccuracies, detailed herein, about the nature and risks of surgical procedures performed to treat gender dysphoria. These misstatements will cause confusion in patients and undermine, rather than strengthen, the informed consent process.

A. *Qualifications*

3. I am a board-certified plastic surgeon. I specialize in gender confirming surgeries, including chest reconstruction, genital reconstruction, and other procedures to feminize or masculinize the face and body, and I am a recognized expert in this field.

4. I received my medical degree from the University of Chicago, Pritzker School of Medicine. I completed my residency and chief residency in plastic and reconstructive surgery and a fellowship in reconstructive microsurgery at the University of Chicago Hospitals.

5. I previously served as a Clinical Professor of Surgery at the University of Illinois at Chicago. I resigned that position to become the Director of Gender Affirmation Surgery at Rush University Medical Center in April 2022. I am also a Professor of Surgery and Urology at Rush University Medical Center. In addition, I maintain a clinical practice in plastic surgery in Illinois where I treat patients from around the country, as well as from around the world.

CONFIDENTIAL

6. I have been performing gender confirming surgeries for over 28 years. For at least the past five years, I have been performing at least 150 gender confirming surgeries each year, and I have performed over 1,500 of these surgeries during my medical career. Currently, approximately 90 percent of patients in my clinical practice are transgender people seeking gender confirming surgery.

7. I was a contributing author to the World Professional Association for Transgender Health's ("WPATH") Standards of Care for the Health of Transsexual, Transgender, and Gender-Nonconforming People, Version Seven, which were published in 2012. In particular, I wrote the section focused on the relationship of the surgeon with the treating mental health professional and the physician prescribing hormone therapy. In September 2022, WPATH published the Standards of Care for the Health of Transgender and Gender Diverse People, Version Eight ("Standards of Care") in the International Journal of Transgender Health. I was the co-lead author of the surgical and postoperative care chapter of Version Eight.

8. In addition, I have written a number of peer-reviewed journal articles and chapters in professional textbooks about gender confirming surgeries. In 2016, I published Surgical Management of the Transgender Patient, the first surgical atlas (a reference guide for surgeons on how to perform surgical procedures using safe, well-established techniques) dedicated to gender confirming surgeries. In 2020, I published a guide for surgeons entitled Gender Confirmation Surgery: Principles and Techniques for an Emerging Field. I am also a co-investigator on a study regarding uterine transplantation for transgender women.

9. I am a guest reviewer for several peer-reviewed medical journals, including the Journal of Plastic and Reconstructive Surgery, the Journal of Reconstructive Microsurgery, the Journal of the American College of Plastic Surgeons, the Journal of Plastic and Aesthetic Research, and the Journal of Sexual Medicine. I also serve on the editorial board of both Transgender Health and the

CONFIDENTIAL

International Journal of Transgender Health. Each of these publications is a peer-reviewed medical journal.

10. I have given dozens of public addresses, seminars, and lectures on gender confirming surgery, including many through the American Society of Plastic Surgeons. I have also taught a number of courses through WPATH's Gender Education Institute, which provides training courses toward a member certification program in transgender health for practitioners around the world. In addition, in 2018, I co-directed the first live surgery course in gender confirming procedures at Mount Sinai Hospital in New York City, and I am the Director for this upcoming live surgery course in 2023. In 2019, I directed the inaugural Gender Affirming Breast, Chest, and Body Master Class for the American Society of Plastic Surgeons.

11. I am also a founding member and president of the Society for Gender Surgeons; a current member of the Executive Committee of the Board of Directors of WPATH, where I serve as treasurer; and a former member of the Board of Governors of the American College of Surgeons. I am a guest examiner for the American Board of Plastic Surgery, which involves administering the plastic surgery oral board exam to surgeons who have completed their plastic surgery training and seek board certification.

12. I am the former Chair of the Patient Safety Committee for the American Society of Plastic Surgeons, and current Patient Safety Officer for the Division of Plastic Surgery at Rush University Medical Center. In 2017, I was an invited discussant at the Pentagon regarding transgender service members. I recently delivered the Bevan 2023 Lecture at the Chicago Surgical Society, which is a lecture that began in 1928 and was established by Arthur Bevan, a former President of the American Medical Association and Founder of the American Board of Surgery.

CONFIDENTIAL

13. I serve on the Committee on Sex and Gender Identification and Implications for Disability Evaluation recently convened by the National Academies for Science, Engineering, and Medicine.

14. The information provided regarding my professional background, experiences, publications, and presentations is detailed in my curriculum vitae, a true and correct copy of the most up-to-date version of which is attached as **Exhibit A**.

B. *Prior Testimony*

15. In the past four years, I have testified as an expert and provided testimony in the following matters: *Dekker v. Weida* (deposition and trial); *Kadel v. Folwell*, M.D.N.C. (deposition); *Toomey v. State of Arizona*, D. Ariz. (deposition); *Fain v. Crouch*, S.D.W.V. (deposition); and *C.R. v. Blue Cross Blue Shield*, W.D. Wash. (deposition).

C. *Compensation*

16. I am being compensated at an hourly rate of \$400/hour plus expenses for my time spent preparing this report and subsequent declaration and providing local testimony (including deposition or providing hearing testimony by telephone or video-teleconference). I will be compensated a flat daily rate of \$7,500 for any out-of-town deposition or hearing testimony. My compensation does not depend on the outcome of this litigation, the opinions I express, or the testimony I may provide.

D. *Bases for Opinions*

17. In preparing this report, I have reviewed the text of documents adopted by the Florida Boards of Medicine and Osteopathic Medicine titled “Surgical Treatments for Adults with Gender Dysphoria (DH5084-MQA (Rev. 06/23)). The opinions contained in this report are based on all of the following: (1) my clinical experience of over 28 years of caring for transgender patients, including my

CONFIDENTIAL

experience teaching other surgeons and medical students to care for this population; (2) my review and familiarity with relevant peer-reviewed literature, including my own, regarding gender confirming surgeries, which reflects the clinical advancements in these procedures and the corresponding growth in research related to the safety and effectiveness of these procedures in treating gender dysphoria; and (3) discussions with colleagues and other experts in the field, including attendance and participation in various educational conferences both nationally and internationally.

II. EXPERT OPINIONS

18. In my expert opinion, the forms are riddled with misstatements and written in a way that will cause more confusion than clarity in a patient preparing to undergo a surgical procedure to treat gender dysphoria. This is true for a number of reasons.

19. Page 1 (“What are the types of surgery to treat gender dysphoria?”). As an initial matter, the forms address a wide range of surgeries, many, and likely most, of which will be wholly inapplicable to an individual patient. As just one example, the form includes descriptions for both a vaginoplasty and a phalloplasty. Setting aside the inaccuracies in each description, which I detail below, no patient will undergo both a phalloplasty and a vaginoplasty. A phalloplasty is a surgical procedure performed on transgender men. A vaginoplasty is a surgical procedure performed on transgender women. There is no purpose for describing a vaginoplasty in an informed consent form to be reviewed and signed by a transgender man. The inclusion of a description of a surgical procedure a patient is not and would never undergo is confusing, disrupts the patient-surgeon relationship, and undermines informed consent.

20. Page 1, Paragraph 3 (“Medical treatment of people with gender dysphoria...”). The form also begins with a misstatement of the evidence that

CONFIDENTIAL

supports the efficacy of surgeries for gender dysphoria. It is incorrect to state that the “practice is purely speculative.” It is also wrong to say that the “treatment of people with gender dysphoria is based on very limited, poor- quality research with only subtle improvements seen in some patient’s psychological functioning in some, but not all, research studies.” There are decades of research demonstrating the efficacy of gender confirming surgeries to treat patients with gender dysphoria, and there have been many studies that show very positive results in ameliorating the effects of gender dysphoria. While the quality of the evidence for much of the research is characterized as “low” because of the hierarchy of evaluation of study designs, the language in the forms is inaccurate and conveys misinformation to a patient.

21. Page 1, Paragraph 3 (“ . . . in many cases, the need for lifelong medical treatments.”). It is also misleading to say that surgeries will result in the need for lifelong treatment. As an initial matter, all patients—transgender or not—have a need for lifelong treatment. That is, generally speaking, healthy medical practice. But there is no correlation between gender confirming surgeries and an increased need for lifelong treatment. In fact, some procedures reduce the need for certain follow-up care. For example, a transgender man who gets male chest reconstruction along with breast removal will have lowered his risk of breast cancer and, therefore, minimized a need for regular mammograms. A transgender woman who receives a vaginoplasty will require annual speculum exams, but the same patient would still have required an annual prostate exam, notwithstanding the vaginoplasty. The statement about a need for life-long treatment is a distortion because, gender confirming surgery may impact the *type* of routine medical care required, it does not create a need for routine medical care. This distortion undermines rather than enhances informed consent. While it is true that the WPATH Standards of Care

CONFIDENTIAL

recommend annual visits for follow-up, that is not the same as stating that gender confirming surgical procedures create the need for life-long treatment.

22. In addition, there are misstatements about many of the surgical procedures themselves. These include the following:

23. Page 1, Orchiectomy: An orchiectomy is not only performed by a urologist. Plastic surgeons, general surgeons, and gynecologists specializing in gender confirming care also routinely perform this surgical procedure. Further, the description of orchiectomy includes only one surgical approach (scrotal incision), but there are other effective surgical approaches for this procedure, including an inguinal approach.

24. Page 2, Vaginoplasty: The description of vaginoplasty states that “[f]or those patients treated with puberty blockers as a minor, such treatment may lead to insufficient penile tissue that could necessitate the use [of] other tissues, such as the colon, to create a vagina.” This statement is relevant to the informed consent discussion when *initiating* blockers, but not when a provider is seeking informed consent for a vaginoplasty. Further, a patient may have insufficient penile *and* scrotal tissue for a number of reasons other than the use of puberty blockers, including, but not limited to, congenital factors, normal anatomic variation, obesity, and previous circumcision. Additionally, tissue, other than that from the colon, may be used to line the vagina, including, but not limited to, skin, small intestine, peritoneum, and tissue substitutes (i.e. allograft, xenograft).

25. Page 2, Phalloplasty: The description of phalloplasty excludes the full range of surgical options for the procedure which may be performed in a number of ways and stages depending on the patient’s clinical needs and desired outcomes. For example, a patient can have a shaft only phalloplasty without the construction of a urethral channel. The procedure may also be performed in a manner that maintains the vaginal canal and uterus. The description purports to

CONFIDENTIAL

comprehensively describe the procedure but describes just one method of surgical procedure while disregarding other routine methods. The techniques used in staging these procedures also vary. For example, we currently perform hysterectomy and vaginectomy at the first stage of a phalloplasty which may also include lengthening of the perineal urethra. The second stage is then construction of the shaft, typically with either forearm, thigh, abdomen, groin, or back tissue. The description of prosthetics is limited and underinclusive. There are both malleable and inflatable penile prosthesis, each with its own advantages and disadvantages.

26. Page 2, Metoidioplasty: The description of metoidioplasty indicates that “[a] urethra is also reconstructed using either local skin tissue or a graft from the mouth” However, this procedure may also be performed without urethral reconstruction. Also, typically, testicular prostheses are not placed at the same time that urethral reconstruction is performed. Prostheses are typically placed at a later date.

27. Page 2, Hysterectomy: The description of hysterectomy is also underinclusive in that it excludes other surgical approaches, notably the option of robotic or traditional ‘open’ techniques.

28. Page 3 (“What happens after surgery to treat gender dysphoria?”). This section underestimates the length of swelling for most procedures. Part of providing informed consent in a shared decision-making process, is discussing, understanding, and ‘managing’ expectations. It is not reasonable to assume that swelling will last for only two to four weeks following cheek and nose surgery. The return to activity following ‘bottom surgery,’ a non-specific term for a range of surgical procedures which may include transfeminine and/or transmasculine procedures, likely underestimates the period of recovery, especially following phalloplasty.

29. Page 3 (“When should I see my surgeon?”). This section omits

CONFIDENTIAL

important risks involved in any surgical procedure performed under general anesthesia such as difficulty breathing, chest pain, shortness of breath (i.e., warning signs of Deep Vein Thrombosis/Venous Thromboembolism/Pulmonary embolus).

30. Page 3 (“What are some potential complications of surgery to treat gender dysphoria?”). The list of surgical risks is confusing because it lists surgical risks that many patients will not face because of the nature of their surgery. For example, a patient undergoing facial feminizing surgery does not have a risk of problems with urination or diminishment of bladder function.

III. CONCLUSION

The informed consent forms required by the State Boards of Medicine and Osteopathic Medicine include factual inaccuracies about the nature and risks of surgical procedures performed to treat gender dysphoria. These misstatements will result in patient confusion and serve to subvert, rather than strengthen, the informed consent process.

I declare under penalty of perjury that the foregoing is true and correct.
Executed this 16th day of August 2023.

Respectfully submitted.
